

STATEMENT OF WORK

ITSM Managed Infrastructure & Server Maintenance Services

Made under Master Services Agreement dated 01-Jun-26

Field	Details
Supplier	CTIND Pvt. Ltd.
Customer	Yen Corp. Ltd.
SOW Effective Date	01-Jun-26
Initial Term	12 months
Commercial Model	Managed Services - Fixed Monthly Fee

1. Parties and Background

This Statement of Work ("SOW") is made on 01-Jun-26 by and between:

- CTIND Pvt. Ltd., a private limited company incorporated in India, having its principal place of business in India, hereinafter referred to as "Supplier" or "CTIND".
- Yen Corp. Ltd., a limited company, hereinafter referred to as "Customer" or "Yen Corp.".

This SOW shall be governed by the terms and conditions contained in the Master Services Agreement ("Agreement") dated 01-Jun-26 between Supplier and Customer. In case of conflict between this SOW and the Agreement, the Agreement shall prevail unless expressly stated otherwise in this SOW.

NOW, THEREFORE, Supplier and Customer agree as follows:

2. Objective of the Engagement

Supplier will provide managed IT infrastructure support and server maintenance services for Customer's agreed server landscape. The objective is to keep Customer's servers online, monitored, secure, patched, and operational through structured IT Service Management ("ITSM") processes, including service desk coordination, incident management, problem management, change support, backup monitoring, server administration, reporting, and governance.

3. Term of the SOW

This SOW shall be effective from 01-Jun-26 ("SOW Effective Date"). The initial term of this SOW shall be twelve (12) months from the SOW Effective Date unless terminated earlier in accordance with the Agreement. The SOW may be renewed or extended by mutual written agreement between the parties.

4. Scope of Services

The Services provided under this SOW shall consist of the following in-scope services:

- 24x7 infrastructure monitoring and alert management for agreed production servers and critical services.
- Windows and Linux server administration including routine health checks, service restarts, configuration checks, disk space monitoring, and basic troubleshooting.
- Incident management including ticket logging, priority classification, assignment, investigation, resolution coordination, escalation, closure, and status communication.
- Problem management support including recurring incident analysis, root cause analysis for major incidents, known error tracking, and preventive action recommendations.
- Change management support including technical inputs, implementation support, rollback validation, change documentation, and post-change monitoring.

- Patch management support including patch calendar coordination, patch deployment support, validation checks, and patch compliance reporting for agreed servers.
- Backup monitoring support including backup job status review, failed backup tracking, escalation, and restore coordination with Customer or third-party backup teams.
- Capacity and availability monitoring including CPU, memory, disk, storage growth, I/O utilization, critical service availability, and threshold-based alerting.
- Service request fulfillment for standard requests such as account access support, storage expansion coordination, server reboot requests, software installation coordination, and configuration updates.
- Monthly governance reporting including SLA dashboard, incident trends, service request volumes, patch compliance, backup exceptions, capacity risks, major incident summary, and improvement actions.
- Knowledge management support including preparation and maintenance of runbooks, frequently occurring issue notes, standard operating procedures, and operational handover notes.

5. Server Landscape and Supported Environment

Area	Supported Scope
Operating Systems	Windows Server 2019/2022, Red Hat Linux, Ubuntu Linux, CentOS or other mutually agreed server operating systems.
Infrastructure Type	Physical servers, virtual machines, and cloud virtual machines as mutually agreed in the server inventory.
Cloud Platforms	AWS, Microsoft Azure, Google Cloud Platform or other mutually agreed cloud platform, subject to access and license availability.
Monitoring	Monitoring tool, ticketing system, and alerting workflow provided or approved by Customer.
Server Inventory	Initial baseline up to 150 servers. Additional servers may be added through change request or revised monthly fee.

6. Functional Requirements

ID	Requirement Area	Requirement Description
FR-01	Monitoring	Supplier shall monitor agreed servers and generate or respond to alerts for threshold breaches.
FR-02	Ticket Management	Supplier shall create, update, assign, track, escalate, and close tickets in the agreed ITSM tool.
FR-03	Incident Management	Supplier shall manage incident lifecycle from logging to closure, including status communication and escalation.
FR-04	Major Incident Support	Supplier shall support major incident bridge coordination, technical triage, and post-incident reporting.
FR-05	Problem Management	Supplier shall analyze recurring incidents and support RCA and corrective/preventive action recommendations.
FR-06	Change Support	Supplier shall support approved changes, implementation windows, rollback checks, validation, and documentation.
FR-07	Patch Support	Supplier shall support patch

		deployment, patch validation, exception tracking, and patch reporting.
FR-08	Backup Monitoring	Supplier shall monitor backup job status, escalate backup failures, and coordinate restore support where required.
FR-09	Capacity Reporting	Supplier shall report disk, memory, CPU, and storage utilization trends for agreed servers.
FR-10	Access Control Support	Supplier shall support agreed access requests subject to Customer approvals and security policy.
FR-11	Knowledge Base	Supplier shall maintain runbooks, known errors, standard procedures, and issue resolution notes.
FR-12	Governance Reporting	Supplier shall provide weekly and monthly operational reports covering SLA, incidents, requests, changes, risks, and improvements.

7. Non-Functional Requirements

- **Service Reliability:** Supplier shall use commercially reasonable efforts to meet agreed service availability and SLA targets.
- **Security:** Supplier personnel shall use Customer-approved access methods, follow least privilege principles, and comply with Customer security instructions provided in writing.
- **Scalability:** Service model shall support addition or removal of servers through agreed change control and revised commercial terms where applicable.
- **Auditability:** Supplier shall maintain ticket updates, approvals, evidence of activities, and operational records in the agreed systems.
- **Continuity:** Supplier shall maintain operational runbooks and escalation contacts to support continuity of services.
- **Confidentiality:** Supplier shall treat Customer information, credentials, infrastructure details, and operational data as confidential.

8. Out of Scope

- Application development, application enhancement, or application functional support unless expressly included through change request.
- Security operations center, managed detection and response, penetration testing, vulnerability scanning ownership, or security incident response ownership.
- Database administration beyond basic service availability checks unless separately contracted.
- Network device administration, firewall administration, telecom/provider management, and data center facility management unless specifically agreed.
- Procurement of tools, cloud subscriptions, third-party licenses, hardware, or infrastructure services.
- Ownership of Customer business continuity, disaster recovery strategy, regulatory compliance, or final operational risk decisions.
- Resolution of issues caused by Customer-owned applications, unsupported third-party products, end-user actions, customer network outages, or force majeure events.
- Onsite support, unless mutually agreed in writing and commercially approved.

9. Delivery Methodology and Governance

- Supplier shall provide managed services using ITSM-based processes for incident, service request, problem, change, and knowledge management.
- Supplier shall participate in weekly operational reviews and monthly service review meetings with Customer.
- Supplier shall maintain a RAID log, SLA report, open ticket tracker, monthly service report, and continuous improvement tracker.
- Customer shall nominate service owner, technical approvers, business approvers, change approvers, and escalation contacts.

10. Service Levels

Priority	Example Condition	Initial Response Target	Resolution / Workaround Target
P1 Critical	Complete outage of critical production service or multiple critical servers unavailable.	15 minutes	4 hours
P2 High	Major degradation affecting significant users or business process.	30 minutes	8 hours
P3 Medium	Limited impact issue or non-critical server/service issue.	4 business hours	24 business hours
P4 Low	Standard service request, query, or low impact issue.	1 business day	3 business days

Resolution targets assume that Supplier has required access, approvals, information, and third-party/vendor support availability. Where final resolution depends on Customer, third-party vendors, hardware replacement, telecom/network provider, cloud provider, or application vendor, Supplier shall be responsible for coordination and commercially reasonable support, not guaranteed resolution.

11. Commercial Model

The engagement shall be provided under a managed services fixed monthly fee model. The commercial model below is sample commercial wording and may be revised by the parties before execution.

Service Tower	Monthly Fee (USD)
24x7 Monitoring & Alert Management	6,000
Server Administration - Windows/Linux	8,000
Incident & Problem Management	4,000
Change Management Support	2,000
Service Desk Coordination	3,000
Reporting & Governance	2,000
Total Monthly Managed Services Fee	25,000
Description	Amount / Terms
Monthly Managed Services Fee	USD 25,000
Initial Term	12 months
Annual Contract Value	USD 300,000
Billing Frequency	Monthly in arrears
Payment Terms	Net 30 days from invoice date
Taxes	Exclusive of applicable taxes
Invoice Dispute Window	Invoices deemed accepted if disputed items are not raised within 15 business days

12. Additional Charges and Change Requests

Activity	Commercial Treatment
New server build or provisioning beyond agreed baseline	Time and Material or Change Request
Major upgrade projects	Change Request
Cloud migration activities	Change Request
Disaster recovery setup or DR drill ownership	Change Request
Security remediation projects	Change Request
New application support or database administration ownership	Change Request
Increase beyond agreed server inventory baseline	Change Request or revised monthly fee

13. Lenient Service Credit / Penalty Clause

The parties agree that SLA-related financial remedies shall be handled through service credits, not punitive damages. Service credits shall be Customer's sole and exclusive remedy for failure to meet applicable service levels, subject to exclusions and caps below.

Monthly SLA Achievement	Service Credit
98% or above	No service credit
95% to 97.99%	2% of Monthly Managed Services Fee
92% to 94.99%	3% of Monthly Managed Services Fee
90% to 91.99%	4% of Monthly Managed Services Fee
Below 90%	5% of Monthly Managed Services Fee

- Maximum service credit in any calendar month shall not exceed five percent (5%) of the Monthly Managed Services Fee.
- Maximum cumulative service credits during the initial term shall not exceed ten percent (10%) of the Annual Contract Value.
- Service credits shall be applied against future invoices and shall not be payable as cash refund unless otherwise agreed by the parties.

- Service credits shall not apply where failure is caused by Customer, third-party providers, tool unavailability, pending approvals, scheduled maintenance, force majeure, security incidents caused by Customer systems, or infrastructure elements outside Supplier's control.
- Supplier shall not be liable for consequential, indirect, punitive, exemplary, or loss-of-business damages arising from SLA failure.

14. Customer Dependencies

- Provide complete and accurate server inventory, criticality classification, owner details, monitoring thresholds, and support matrix.
- Provide timely access to servers, monitoring tools, ticketing tools, VPN, privileged access management tools, backup tools, and cloud consoles as required.
- Provide approved maintenance windows, patch schedules, change calendar, and escalation contacts.
- Provide licenses, subscriptions, third-party vendor support, and tool availability necessary to perform the Services.
- Provide timely approvals for changes, access, emergency workarounds, downtime, and remediation actions.
- Ensure Customer applications, network, telecom, hardware, and third-party systems are supported by appropriate owners or vendors.

15. Assumptions

- Services are based on a maximum baseline of 150 servers unless otherwise agreed in writing.
- Supplier will provide remote support only; onsite support is excluded unless separately agreed.
- Customer will remain owner of business decisions, infrastructure architecture, licenses, tooling, security policies, and third-party vendor relationships.
- Supplier will not be responsible for outages or delays caused by lack of access, incorrect access, pending approvals, unsupported systems, third-party failures, or infrastructure outside agreed scope.
- Any changes to server count, support hours, scope, tooling, SLA, regulatory requirements, security obligations, or support model may impact timelines, resource model, and fees.

16. Acceptance Criteria

- Services are deemed accepted monthly if Supplier provides the monthly service report and Customer does not raise written material non-conformance within ten (10) business days.
- Service reporting shall include ticket summary, SLA performance, major incidents, service requests, changes, patch status, backup exceptions, capacity risks, and improvement recommendations.
- Customer may dispute only specific non-conforming Services with supporting evidence from agreed tools or records.

17. Acceptance Process

Supplier shall submit monthly service reports. Customer shall review and provide acceptance or specific written non-conformance within ten (10) business days from receipt of the report. If Customer does not provide written non-conformance within such period, the monthly Services shall be deemed accepted.

18. Change Management Process

The parties may introduce changes in scope, deliverables, service levels, server inventory, support hours, resource model, dependencies, tools, or fees only through a written change request or written amendment signed by both parties. Requirements not expressly listed as In Scope shall be treated as change requests.

19. Expenses

The current scope does not include onsite travel. Any travel or out-of-pocket expenses, if requested and pre-approved by Customer in writing, shall be reimbursed at actuals in accordance with the Agreement or mutually agreed travel policy.

20. Location of Resources

Resources will be based out of India or any other place of work assigned by Supplier for this project. The current scope of Services does not include onsite services. Any change to this assumption shall follow the change management process.

21. Subcontractors

N.A. No subcontractors are assumed for this SOW unless mutually agreed in writing by both parties through a change request or amendment.

22. Supplier IP / Tools

Project deliverables and Services may use Supplier’s pre-existing tools, templates, scripts, runbooks, accelerators, know-how, and reusable frameworks (“Supplier Background IP”). Supplier shall retain ownership of Supplier Background IP. Subject to full payment of applicable fees, Supplier grants Customer a non-exclusive, non-transferable right to use such Supplier Background IP solely as embedded in or necessary for use of the deliverables for Customer’s internal business purposes.

23. Third-Party Tools / Materials

If any third-party licenses, monitoring tools, ITSM tools, backup tools, cloud subscriptions, privileged access tools, endpoint tools, or infrastructure services are required, Customer shall procure such licenses or subscriptions at its cost unless expressly included in this SOW. Customer shall ensure that it has valid rights to provide Supplier access to such tools and materials for the performance of Services.

24. Payment Entitlement

Supplier shall be entitled to payment for all Services performed up to the effective date of termination, including accepted Services, work in progress, and any investments or third-party costs incurred for or on behalf of Customer.

25. Signatures

IN WITNESS WHEREOF, the parties set forth below have executed this SOW as of the SOW Effective Date.

For Yen Corp. Ltd.	For CTIND Pvt. Ltd.
Name: _____	Name: _____
Title: _____	Title: _____
Date: _____	Date: _____
Signature: _____	Signature: _____

Annexure 1 - Service Transition and Delivery Plan

The following plan is indicative and may be refined during transition based on Customer infrastructure readiness, access availability, and server inventory finalization.

#	Milestone / Deliverable	Estimated Due Date	Acceptance Output
1	Kick-off, access planning, server inventory validation, tool access setup, support matrix, escalation matrix, and transition plan.	15-Jun-26	Approved transition plan and access checklist.
2	Monitoring onboarding, service desk workflow setup, incident categorization, SLA configuration, and initial runbooks.	31-Jun-26	Monitoring and ticket workflow readiness confirmation.
3	Steady-state operations start: monitoring, incident handling, service request support, backup monitoring, patch coordination, and weekly reporting.	01-Sep-26	Steady-state go-live confirmation.
4	Monthly governance: SLA dashboard, incident trend analysis, capacity report, backup exception report, patch compliance, risks, and improvement actions.	Monthly	Monthly service report accepted or deemed accepted.

Annexure A-1 - Change Request Template

Change Request # _____

This Change Request dated <<Date>> (“Effective Date”) is made part of the Statement of Work dated 01-Jun-26 between Yen Corp. Ltd. and CTIND Pvt. Ltd.

Field	Description
Change Request Number	CR-_____
Effective Date	<<Date>>
Requested Change	Describe revised scope, deliverables, service levels, server count, support hours, dependencies, or tools.
Timeline Impact	Describe change in schedule or transition, if any.
Fees Impact	Describe revised monthly fee, one-time fee, or commercial impact, if any.
SLA Impact	Describe revised SLA, service credit, or reporting impact, if any.
Approvals	Customer and Supplier authorized signatories.

All other terms of the SOW shall remain in full force and effect unless expressly amended through this Change Request.
